

Company Overview

SkyLinode Technologies Private Limited is a software engineering company focused on designing, developing, deploying, and maintaining secure digital platforms. We build software systems for enterprises, implementation partners, and public-sector projects, including portals, workflow systems, dashboards, integrations, mobile applications, and AI-assisted internal tools.

We position ourselves as a specialist execution partner for software-heavy projects rather than a broad infrastructure contractor. Our delivery model emphasizes documentation, milestone-based execution, maintainable architecture, and clear engineering ownership.

Company Details

Legal Name	SkyLinode Technologies Private Limited
CIN	U62099DL2025PTC451208
Type	Indian Private Limited Company
Incorporated	2025
Headquarters	Eldeco Centre, 2nd Floor, Malviya Nagar, New Delhi 110017
Core Focus	Software Engineering, Digital Platforms, AI-Assisted Systems
GSTIN	07ABQCS6669B1ZV
MSME	UDYAM-DL-05-0067435
Email	contact@skylinode.com
Phone	+91 92177 46573
Website	skylinode.com
Business Hours	Monday-Friday, 10:00 AM - 7:00 PM IST

Solution Areas

- Workflow Automation: Submissions, approvals, routing, escalations, SLA tracking, audit trails
- Portals & Service Platforms: Citizen portals, registration systems, application tracking
- Dashboards & MIS: Program monitoring, drill-down reports, exception tracking, reporting
- Document & AI Systems: Extraction, classification, summarization with human-in-the-loop review
- Mobile & Field Operations: Offline-ready inspections, surveys, geo-tagging, supervisory dashboards
- Integration & Modernization: API layers, legacy modernization, migration support, phased rollouts

Delivery Methodology

Every project follows a structured path from discovery to long-term support. Each phase produces inspectable deliverables suitable for formal review and handover.

PHASE	KEY OUTPUTS
Discovery	Scope document, stakeholder map, risk register
Solution Design	Architecture document, wireframes, technical spec
Build	Working software, sprint demos, code documentation
QA & Validation	Test reports, performance audit, issue log
Deployment	Deployment guide, user manual, admin notes
Support	SLA reports, enhancement roadmap, incident log

Engagement Models

- Direct Delivery: Full project ownership from discovery to support
- Pilot & POC: Proof-of-concept builds to validate approach before full commitment
- Module Delivery Under SI: Software component delivery as part of a larger consortium
- Maintenance & Enhancement: Long-term support, improvements, and version management

Security & Compliance Posture

- Secure SDLC with security at every phase
- Isolated dev, staging, and production environments
- Controlled deployment pipeline with review gates
- VAPT-ready architecture and release controls
- Least-privilege access with role-based permissions
- TLS/HTTPS for all data in transit, encryption at rest
- Comprehensive logging and audit trail support
- Documented incident response and issue triage

Certifications and formal audits can be pursued as the company grows. The engineering and process posture already reflects secure delivery discipline.

Government & PSU Readiness

SkyLinode supports departments, PSUs, consultants, and implementation partners with software-heavy digital systems. We fit as a:

- Direct software development partner for focused digital projects
- Specialist module delivery partner under a larger SI or consortium
- Modernization partner for existing portals or internal systems
- Maintenance and enhancement partner for software in operation
- Pilot or proof-of-concept build partner for new digital initiatives
- Technical advisor for architecture reviews and technology selection

Why Work With SkyLinode

Engineering Depth

Every team member writes and reviews code. Technical decisions made by engineers.

Maintainable Systems

Clean code, typed interfaces, tested modules, and thorough documentation.

Clarity in Communication

Status updates, scope documents, and architecture notes delivered on schedule.

Low-Noise Delivery

No unnecessary meetings, no inflated teams, no surprises. Predictable cadence.
